## Instructions

Errata for ICD-10-AM Tabular List, ICD-10-AM Alphabetic Index, ACHI Tabular List and ACHI Alphabetic Index are produced from a database. This has resulted in the format shown below. Each row represents an item/change to be made and contains the following information necessary to complete the errata item.

### Tabular/Index Entry

The Tabular Entry (Block:code) or Index Entry (Main term:subterm) to which the errata item applies. For example:

<table>
<thead>
<tr>
<th>Tabular/Index Entry</th>
<th>ICD-10-AM Tab List:R02</th>
<th>ICD-10-AM Tab List, Code R02</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACHI Tab List:1886:34533-00</td>
<td>ACHI Tabular List, Block 1886, Code 34533-00</td>
<td></td>
</tr>
<tr>
<td>ACHI Index:Revision:device:infusion, implantable spinal</td>
<td>ACHI Alphabetic Index, Revision - device - infusion, implantable spinal</td>
<td></td>
</tr>
</tbody>
</table>

### Note Type

The part of the Tabular or Index Entry to which the errata item applies. To use this errata, it is important to think of a Tabular Entry and an Index Entry as being composed of separate elements as shown in the examples below.

### Tabular Entry

<table>
<thead>
<tr>
<th>Code</th>
<th>Standard</th>
<th>Instruction</th>
<th>Existing Value</th>
<th>New Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>R32</td>
<td>▼ 1808</td>
<td>Unspecified urinary incontinence</td>
<td>Code Description</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Enuresis NOS</td>
<td>Inclusional</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Excludes: nonorganic enuresis (F98.0)</td>
<td>Excludes</td>
<td>Excludes</td>
</tr>
<tr>
<td></td>
<td></td>
<td>stress incontinence and other specified urinary incontinence (N39.3-N39.4)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Index Entry

<table>
<thead>
<tr>
<th>Term</th>
<th>Code</th>
<th>Instruction</th>
<th>Existing Value</th>
<th>New Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dacryocystitis</td>
<td>(acute)</td>
<td>Add</td>
<td>- phlegmonous</td>
<td></td>
</tr>
<tr>
<td>- syphilitic</td>
<td>A52.7†</td>
<td>H06.0*</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Endoscopy, endoscopic</td>
<td>— see also Panendoscopy</td>
<td>See Also</td>
<td>NEM (non essential modifier)</td>
<td></td>
</tr>
<tr>
<td>- brain</td>
<td>(intraventricular)</td>
<td>40903-00</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- - with biopsy</td>
<td>40903-01</td>
<td>[12]</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Instruction

Type of change to be made. For example:

<table>
<thead>
<tr>
<th>Tabular/Index Entry</th>
<th>Note Type</th>
<th>Instruction</th>
<th>Existing Value</th>
<th>New Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICD-10-AM Index:Complications:umbilical cord</td>
<td>Term</td>
<td>Add</td>
<td>- - velamentous insertion</td>
<td></td>
</tr>
</tbody>
</table>

*A ‘Delete’ instruction followed by an asterisk (*) indicates that there are subterms to be deleted as a result of this deletion. In the example given above, subterms and notes to be consequently deleted are:

It should be assumed that if a Tabular ‘Code’ or an Index ‘Term’ is deleted, all its accompanying notes (‘Code Description’, ‘Include’, ‘Exclude’, ‘NEM’, ‘Code’, ‘Block’, ‘See Also’, etc) need to be deleted.

### Existing Value

Text of the entry before the errata change.

### New Value

Text with errata in track changes.
## ERRATA 1, June 2013

0048 CONDITION ONSET FLAG

GUIDE FOR USE

5. For combination codes (see ACS 0015 Combination codes) where a diagnosis when a single ICD-10-AM code describes multiple concepts (i.e., a combination code) and any concept within the code meets the criteria of COF 1, and is not represented by another code with a COF 1 value, then assign COF 1 to the combination code (see Example 2).

EXAMPLE 11:
Patient admitted with uncontrolled Type 2 diabetes. The patient is known to have nephropathy (CKD stage 3) but no other complications of the diabetes. During admission the patient develops acute kidney failure.

1 – Acute kidney failure
2 – Type 2 diabetes mellitus uncontrolled
24 – Type 2 diabetes mellitus with acute kidney failure
2 – Type 2 diabetes mellitus with chronic kidney disease
2 – Chronic kidney disease, stage 3

0102 HIV/AIDS

EXAMPLE 1:
Antiretroviral drug-induced haemolytic anaemia with HIV positive status.
A patient is admitted with oral candidiasis due to HIV infection.

Assign and sequence as:

Oral candidiasis B37.0 Candidal stomatitis
HIV disease B20 Human immunodeficiency virus [HIV] disease resulting in infectious and parasitic diseases

EXAMPLE 2:
A patient with AIDS is admitted with a principal diagnosis of Kaposi sarcoma of skin, and additional diagnoses of wasting syndrome and CMV retinitis.

Assign and sequence as:

Kaposi sarcoma C46.0 Kaposi sarcoma of skin Drug-induced nonautoimmune haemolytic anaemia
M9140/3 Kaposi sarcoma
HIV disease B21 Human immunodeficiency virus [HIV] disease resulting in malignant neoplasmyAntiviral drugs causing adverse effects in therapeutic use
CMV retinitis H30.9 Chorioretinal inflammation, unspecified
B25.8 Other cytomegaloviral diseases
Wasting syndrome R64 Cachexia

0402 CYSTIC FIBROSIS

Cystic fibrosis (CF) should be coded with the appropriate code from E84.- Cystic fibrosis followed by a code(s) for any specified manifestation(s), irrespective of whether the manifestation(s) meets ACS 0002 Additional diagnoses. More than one code from E84.- Cystic fibrosis should be used if the patient presents with multiple manifestations of CF.
2. CODE THE FOLLOWING INTERVENTION WHEN PERFORMED:

Parenteral fluid therapy
96199-07 [1920] *Intravenous administration of pharmacological agent, nutritional substance* and
96199-08 [1920] *Intravenous administration of pharmacological agent, electrolytes* should be assigned
when used for management of carbohydrate, hydration or electrolyte disorders.

Examples of diagnoses that may require parenteral fluid therapy are 'neonatal hypoglycaemia' (P70.-
_Transitory disorders of carbohydrate metabolism specific to fetus and newborn) or 'other transient
neonatal electrolyte disorders' (P74.- *Other transitory neonatal electrolyte and metabolic disturbances*).

*Note:* These codes should not be assigned when these procedures are part of resuscitation at birth.
CHAPTER 1
CERTAIN INFECTIOUS AND PARASITIC DISEASES
(A00–B99)

... includes diseases generally recognised as communicable or transmissible

Use additional code (Z06–Z07) to identify resistance to antimicrobial and antineoplastic drugs

Excludes: carrier or suspected carrier of infectious disease (Z22.–)
certain localised infections — see body system-related chapters
infectious and parasitic diseases complicating pregnancy, childbirth and the puerperium [except obstetrical tetanus] (O98.–)
infectious and parasitic diseases specific to the perinatal period [except tetanus neonatorum, congenital syphilis,
perinatal gonococcal infection and perinatal human immunodeficiency virus [HIV] disease] (P35–P39)
influenza and other acute respiratory infections (J00–J22)

PAGE 32

CHAPTER 2
NEOPLASMS (C00–D48)

... Note: ...

8. Use of the third edition of International Classification of Diseases for Oncology (ICD-O)

For certain morphological types, Chapter 2 provides a rather restricted topographical classification, or none at all. The
topography codes of ICD-O use for all neoplasms essentially the same three- and four- character categories that Chapter 2 uses
for malignant neoplasms (C00–C77, C80.–), thus providing increased specificity of site for other neoplasms (malignant secondary
(metastatic), benign, in situ and uncertain or unknown).

It is therefore recommended that agencies interested in identifying both the site and morphology of tumours, e.g. cancer
registries, cancer hospitals, pathology departments and other agencies specialising in cancer, use ICD-O.

Use additional code (Z07) to identify resistance to antineoplastic drugs
Other disorders of white blood cells

Excludes: abnormal white blood cells (count) (R72)
basophilia (D75.8)
immunity disorders (D80–D89)
neutropenia (D70)
preleukaemia (syndrome) (D46.9)

Genetic anomalies of leukocytes

Anomaly (granulation)(granulocyte) or syndrome:
• Alder
• May-Hegglin
• Pelger-Huët

Hereditary:
• leukocytic:
  • hypersegmentation
  • hyposegmentation
  • leukomelanopathy

Excludes: Chediak(-Steinbrinck)-Higashi syndrome (E70.3)

Ventral hernia

Includes: hernia:
• epigastric
• hypogastric
• incisional
• midline
• parastomal
• spigelian
• subxiphoid
CHAPTER 19
INJURY, POISONING AND CERTAIN OTHER CONSEQUENCES OF EXTERNAL CAUSES (S00–T98)

... 

Fracture including:
fracture:
• closed:
  • comminuted
  • depressed
  • elevated
  • fissured
  • greenstick
  • impacted
  • linear
  • march
  • simple
  • slipped epiphysis
  • spiral
  • dislocated
  • displaced

**Includes:**
- cardiac catheterisation
- valvuloplasty

**Code also when performed:**
- coronary angiography (38215-00, 38218 [668])
Replacement of tricuspid valve

Code also when performed:
• cardiopulmonary bypass (38600-00, 38603-00 [642])
• operative management of acute infective endocarditis during heart valve procedure (38493-00 [666])

Percutaneous replacement of tricuspid valve with bioprosthesis

Includes: cardiac catheterisation
cardiovascular intervention
valvuloplasty

Code also when performed:
• coronary angiography (38215-00, 38218 [668])

Repair or replacement of pulmonary valve

Percutaneous balloon pulmonary valvuloplasty

Includes: cardiac catheterisation
valvuloplasty

Percutaneous replacement of pulmonary valve with bioprosthesis

Transcatheter pulmonary valve implantation

Includes: cardiac catheterisation
cardiovascular intervention
valvuloplasty

Code also when performed:
• coronary angiography (38215-00, 38218 [668])

Venous catheterisation

Catheterisation/cannulation of other vein in neonate

Includes: infusion
Other therapeutic interventions on respiratory system

92210-00 Nitric oxide therapy

**Code first:**
- ventilatory support for neonates (13882 [569], 92209 [570])

**ACHI ALPHABETIC INDEX OF INTERVENTIONS**

**Correction** — see also Repair

- ptosis
  - breast 45556-00 [1755]
  - eyebrow (bilateral) 45588-01 [1675]
  - - unilateral 45587-01 [1675]
1615  SPECIFIC INTERVENTIONS FOR THE SICK NEONATE

2. CODE THE FOLLOWING INTERVENTION WHEN PERFORMED:

Catheterisation in a neonate

- 13300-00 [738]  Catheterisation/cannulation of other vein in neonate
- 13300-01 [738]  Scalp vein catheterisation/cannulation in neonate
- 13300-02 [738]  Umbilical vein catheterisation/cannulation in neonate
- 13319-00 [738]  Central vein catheterisation in neonate
- 13303-00 [694]  Umbilical artery catheterisation/cannulation in neonate

Note: When multiple catheterisations are performed during an episode of care and the same procedure code applies, assign the procedure code once only.
