Tier 2 Outpatient Clinic Definitions

A. Context

A.1 Evolution of the Tier 2 Outpatient Clinic Definitions

A list of outpatient Clinics was developed in 1997-98 as an outcome of the Developmental Ambulatory Classification Study conducted by the National Hospital Cost Data Collection (NHCCDC).

During 2011, the list was updated from 89 to 107 clinics to accommodate the increase in services that were previously provided to inpatients being undertaken as outpatient services. This also included a full review of the classification in response to the 2011 National Health Reform Agreement (NHRA), which provided for the introduction of a national activity based funding (ABF) system. The aim was to develop a classification system for use with non-admitted outpatient services for ABF purposes. The outcome of the review was the publication of Version 1.0 of the Tier 2 Outpatient Clinic Definitions, which was released on 1 September 2011.

A.2 Structure of Tier 2 Outpatient Clinic Definitions

Tier 2 clinics provide a consistent framework for counting non-admitted *service events*. They are based on an assessment of both the type of clinician providing the service and the nature of the service provided. This has resulted in a number of clinics that is sufficient to ensure clinical meaningfulness and exclusivity across the spectrum of non-admitted services.

The clinics are also grouped into a number of categories that reflects the type of service provided and the clinicians that typically provide the service. This is consistent with the use of Multiple Diagnostic Categories in the AR-DRG classification, which organises DRGs into 24 categories based on their clinical attributes. The clinics are grouped into four categories, as follows:

Category	Description	Range of Clinics
Procedures	Procedures provided by a surgeon or other medical specialist.	10.01 – 10.14
Medical Consultation	Medical consultations provided by a general physician or medical specialist	20.01 – 20.51
Stand-alone Diagnostic	Diagnostic services, within a specific field of medicine or condition (e.g. epilepsy).	30.01 – 30.08
Allied Health and/or Clinical Nurse Specialist Intervention	Services provided by an allied health professional or clinical nurse.	40.01 – 40.34

Tier 2 Outpatient Clinic Definitions

A.2 Summary of Changes in Version 1.2

40.04 Clinical Pharmacology has been renamed and modified to indicate that the usual provider is a *clinical pharmacist*. This clinic is now called *Clinical Pharmacy*. However, the clinic number is unchanged. 40.34 has also been renamed.

A.4 Tier 2 Outpatient Clinic Definitions – Version History

- Version 1.0 Tier 2 Outpatient Clinic Definitions, 1st September 2011
- Version 1.0.2 Released on the 28th October 2011 - with updates to typographical errors, as well as updates/ changes to 'Affected Body Part' Major Diagnostic Categories (MDC's). Used for reporting in 2010-11.
- Version 1.2 Draft Released on 21 March 2012. Final issued on 8 June to be used for reporting from 2012-13.

Tier 2 Outpatient Clinic Definitions

B. Definitions

B.1 Principal Definitions

B.1.1 Outpatient clinic services

An outpatient *clinic* is defined by the National Health Data Dictionary in the following terms:

“Hospitals use the term ‘clinic’ to describe various arrangements under which they deliver specialist outpatient services to non-admitted non-emergency department patients. Services provided through specific organisational units staffed to administer and provide a certain range of outpatient care in defined locations, at regular or irregular times and where one or more specialist providers deliver care to booked patients. Generally, in such clinics, a booking system is administered and patient care records are maintained to document patient attendances and care provided”.¹

B.1.2 Non-admitted patient service event

A non-admitted patient *service event* is defined by the National Health Data Dictionary as:

“An interaction between one or more healthcare provider(s) with one non-admitted patient, which must contain therapeutic/clinical content and result in a dated entry in the patient's medical record”.²

Tier 2 Outpatient Clinic Definitions

B.2 Data Element Definitions

B.2.1	Heading: Number and clinic title (contents page link)	
	Identifying attributes	
B.2.2	Number	<i>Numerical identifier</i>
B.2.3	Name	<i>Clinic title</i>
B.2.4	Category	<i>First level category of clinic classification</i>
B.2.5	Affected body part	<i>Indicates the AR-DRG Major Diagnostic Category (MDC) to which patients visiting the clinic would be classified.</i>
B.2.6	Usual Provider	<i>This element is for guidance only and specifies the discipline that usually provides the services in the clinic. More than one provider may be listed in some clinics but this does not mean that all providers must be present. May include interns and registrars rostered to a medical specialist.</i> <i>In some smaller settings, the services in the operational clinic may be provided by general clinician, e.g. general physician for endocrinologist in diabetes clinic.</i> <i>Provider names from the Australian and New Zealand standard classification of occupations (ANZSCO – 1st Edition, July 2010) have been used where applicable.</i>
B.2.7	Definition of service	<i>The description of the clinic. Incorporates the overarching activities that are conducted during the clinic.</i>
	Guide for Use	
B.2.8	Activity	<i>Inclusions:</i> <i>Specific examples of services provided in the clinic. Inclusions are not exhaustive and include references to consultations, management and /or treatment of specific conditions.</i> <i>Exclusions:</i> <i>Specific examples of services that should not be attributed to the clinic. Also includes cross references to services provided in other clinics.</i>
B.2.9	Conditions	<i>The condition is documented if it is specific to the clinic at the exclusion of all other conditions under the MDC.</i>
B.2.10	Constraints	<i>Overarching issues of Tier 2 exclusivity regarding clinic classification convention are also specified where applicable.</i>
	Administrative attributes	
B.2.11	Source	<i>Original source documentation from which clinic classification created.</i>
B.2.12	Date Created	<i>Date first created.</i>
B.2.13	Date Last Updated	<i>Date the content was last updated (excludes formatting).</i>
B.2.14	Update source	<i>The rationale for content update – source or project.</i>
B.2.15	Reference material	<i>Reference style - American Psychological Association (APA). All references were checked for currency at time of</i>

finalising Version 1.0 clinic definitions and Web access dates documented accordingly.

Tier 2 Outpatient Clinic Definitions

C. General Business Rules

The following rules apply across the Tier 2 Clinic Classification and have been developed to assist jurisdictions map (or categorise) hospital operational clinics to a Tier 2 for the purpose of reporting and funding. For business rules specific to a Tier 2 category, refer to the “Guide for Use” under the appropriate clinic.

Please refer to the Non Admitted Patient ABF Data Set Specification (NAP ABF DSS) for further information about the counting rules used for non-admitted service events. The business rules outlined in this document should be read in conjunction with the counting rules outlined in the NAP ABF DSS.

C.1 Where there is a mix of medical specialists and allied health/clinical nurse specialists (CNS) in the one operational clinic for a specific service, this clinic will map to the Tier 2 medical clinic for that service. In medical consultation/procedural/diagnostic clinics, it is assumed that there may also be input from allied health/CNS personnel.

C.2 Spontaneous consultations provided by a medical specialist to an allied health/clinical nurse specialist led operational clinic should not result in a reassignment to a Tier 2 medical consultation clinic. These services should be categorised to the relevant Tier 2 clinic in category 4, Allied Health &/or Clinical Nurse Specialist Interventions.

C.3 Where there are allied health/CNS professionals providing the service in the operational clinic, the clinic should be categorised to the appropriate allied health/CNS Tier 2 clinic.

C.4 Where a clinic is a combination of two or more disciplines (e.g. a *Respiratory Cancer* clinic), use the “50% or more” rule to determine which clinic a service event is to be reported against, using the usual provider as the criterion. For example, if 60% of the clinic’s activity is performed by a respiratory specialist, all service events performed by the clinic should be reported under *20.19 Respiratory*.

C.5 Specialist paediatric operational clinics in specialist children’s hospitals should be categorised to the appropriate medical specialty in Tier 2 clinic, rather than *20.11 Paediatric Medicine* or *20.12 Paediatric Surgery*. In these circumstances, clinics *20.11* and/or *20.12* may only be used for general paediatric services not covered by specialist paediatric operational clinics.

C.6 In some settings, there may be a combination of procedure and consultation services within the one operational clinic. In this scenario, unless the majority of the services provided are procedural, map the operational clinic to the appropriate Tier 2 medical consultation clinic.

Tier 2 Outpatient Clinic Definitions

C.7 For ABF purposes, stand-alone diagnostic (ancillary) clinics do not report service events; these are an integral part of the 'requesting' Tier 2 clinic service event.

Haemodialysis; The patient's blood is pumped through tubing to a haemodialysis machine that acts as an artificial kidney, filtering waste products from the blood before returning it to the patient. Peritoneal dialysis: A form of dialysis provided to patients where access to the peritoneum is by means of a small tube, or catheter, which is inserted surgically into the abdomen. The patient is then able to undertake peritoneal dialysis at home as a treatment necessary for renal failure.</p>
<p>Guide for Use</p> <p style="padding-left: 40px;">Activity</p> <p style="padding-left: 40px;">Conditions</p>	<p><i>Inclusions:</i></p> <p>Management of:</p> <ul style="list-style-type: none"> ▪ automated peritoneal dialysis (APD) ▪ continuous ambulatory peritoneal dialysis (CAPD) ▪ continuous cycling peritoneal dialysis (CCPD) ▪ haemodialysis ▪ nocturnal dialysis <p><i>Inclusions:</i></p> <ul style="list-style-type: none"> ▪ end stage kidney failure
